

TREE SEEDLING 2-PACK

A 2-pack of seedling trees emphasises the Christmas theme. These plants have the potential to become forest trees, but are capable of giving great pleasure in suitable containers for many years to come.

The plants will be from the following list (depending on availability).

KEY:	Sunlight			Water			Wind	
	Full sun	Mid sun	Shade	Wet	Damp	Dry	Sheltered	Exposed

Libocedrus plumosa – kawaka, NZ cedar

Height: 6m; Spread: 2m

Ornamental specimen tree similar to exotic conifers in appearance. Prefers sites with shelter and cool soil. This tree maintains a Christmas tree shape and is slow-growing. It looks rather like a pine and survives well in a large pot, making it a great permanent living Christmas tree that grows with the family.

Metrosideros excelsa – pohutukawa

Height: 15m; Spread: 15m

The New Zealand Christmas tree needs little introduction. Red flowers at Christmas time. Frost tender as juvenile. Extremely tough in coastal conditions on dry rocky shores. Survives well in a large pot. It is found naturally to the north of a line through Taupo. For locations south of this we would substitute a totara.

Podocarpus totara var. totara – totara

Height: 10m; Spread: 9m

A very attractive specimen tree. Very hardy. The somewhat prickly foliage also makes an effective hedge.

Pricing: 2-Pack with 2 Tree Seedlings, Information Sheet and Planting Instructions in a carry carton: \$20.00 including GST and excluding delivery costs.
